## TIP OF THE MONTH: POSITIVE OUTLOOK !!!

### A positive outlook on your game can alter the outcome of your matches!

If you are suffering from a negative thinking pattern on the tennis court, your game will also deliver disappointing results. You must take steps to change your attitude and your thinking, so you can begin to experience success and satisfaction.

- Attitude affects your belief about your potential for success. Positive thinking makes you willing and confident to take the steps and actions necessary for success. If you are working on changing your technique or learning a new serve with the purpose to improve the level of your game, your positive attitude will encourage you to continue practicing knowing that you will succeed.
- Attitude determines how you view a challenge. A positive mind set will allow you to keep moving undaunted, while using the challenge as a potential stepping stone to your goal.
- Attitude determines your confidence. A positive attitude convinces you that you can succeed, as it will proceed in a pro-active way on your behalf. When you put into practice your new strategy and it is successful, your confidence will grow if you have positive thinking.
- Attitude affects how you view opportunity. When you respond to life with a negative attitude, you become blind to opportunity. With a positive attitude, you will be able to “open” your eyes and your mind to the countless opportunities.

If you practice your positive attitude techniques more often, you will develop a new habit or thought and very soon you will see the positive results and you will have more fun on the court.

Have fun and **SMILE** !
