Ticket drawings will determine prize winners.

Please call 326.3832 to reserve your space.

Homes built Pre-'78 most likely
contain some lead based paint.

- Lead is toxic.
- It can harm your child's brain; create learning difficulties and behavior problems.
- Children under six are most at risk. Lead can also harm unborn babies.
- It can happen to your child. Almost one million children in the U.S. under age six suffer from lead poisoning.
